

SOLID 
BROADHEAD COMPANY®

IN BOWHUNTING, EQUIPMENT SELECTION IS EVERYTHING.

IT'S MORE THAN AN EMOTIONAL DECISION.
IT'S A MATTER OF FACT.

And the fact is – Built on a Foundation of Four Guiding Principles Solid Broadheads deliver the best option to achieve success in the field. The critical combination of Devastation on Delivery, Laser-Like Accuracy, Beyond Razor Sharp and Durable Designs bond to deliver a lethal strike, second to none. Constructed with top-quality materials, Solid Broadheads fly true, penetrate deep and smash bone, time and time again.

BEYOND RAZOR SHARP

The blades on a Solid Broadhead are all leather-stropped before leaving the factory. This removes all burrs and makes an already sharp broadhead even sharper. And they stay sharp, even after going through bone!

20° BLADE ANGLE

The optimal angle for maximum cutting ability.

ZERO TAPERED FERRULE

Tapers down to almost nothing, which allows air to slide over without disruption for more accurate and quiet flight.

PENETRATOR (BLEEDER) BLADE BORES CHANNEL

The reason Solid Broadheads penetrate bone better is because the Penetrator blade creates a hole just large enough for the arrow shaft to go through, which reduces friction.

STEEL CUT-ON-CONTACT TIP

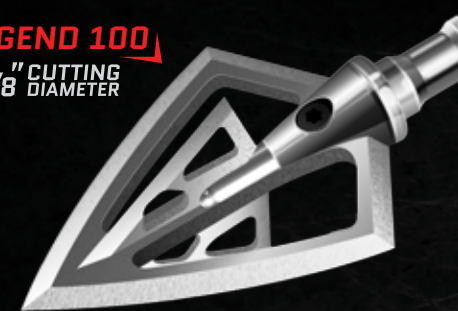

The tip is reinforced by the Penetrator blade, which supports the main blade for superior strength.

SAMURAI-STYLE S30V STAINLESS STEEL CURVED BLADES

Improves the ability to cut by constantly changing the slicing angle that is being applied.

DEVASTATION ON DELIVERY

Solid broadheads don't just cut, they devastate! We combine centuries of cutting know-how with the best in high-tech engineering to create the ultimate in broadhead performance. The damage begins with a lead cutting tip and curved, Samurai-style main blades. Special purpose auxiliary blades chip in to bust bone, explode cuts and destroy anything they contact. Together they combine to create the ultimate devastation machine.

**1 1/8" CUTTING
DIAMETER**

**100
GRAINS**

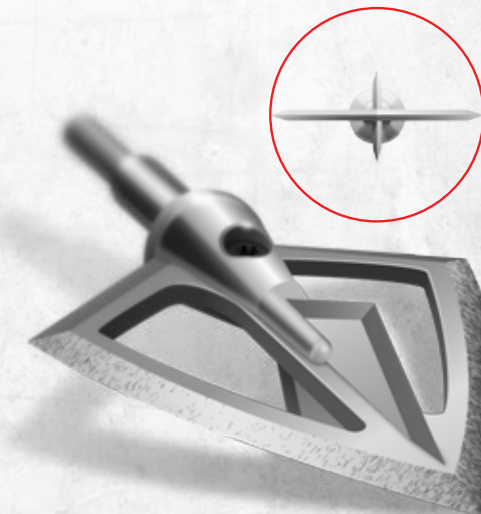

AVAILABLE:
FOCUSED ENERGY
**DEEP
SIX**

Special purpose auxiliary bleeder blades. 1/2" penetrator for bone blasting -or- 3/4" vented for EXTREME blood letting.

- STEEL CUT-ON-CONTACT TIP
- SAMURAI-STYLE CURVED BLADES
- 20° BLADE ANGLE
- .060" THICK S30V STAINLESS STEEL BLADES
- ZERO-TAPERED FERRULE
- AVAILABLE IN STANDARD OR DEEP SIX FERRULES

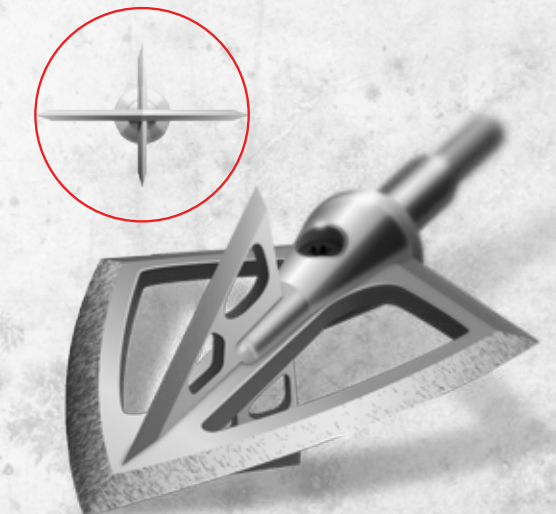

1/2" BLEEDER

4.80" TOTAL CUTTING EDGES

3/4" BLEEDER

5.32" TOTAL CUTTING EDGES

LASER LIKE ACCURACY

If you can't hit it, you can't kill it; it's that simple. Arrow flight is the linchpin of our broadhead system. Broadhead flight is centered around two things: aerodynamics and concentricity (spin). Solid broadheads deliver the best of both. They are designed to an exacting coefficient of accuracy. Testing ensures adherence to strict aerodynamic principles. Our ferrules are machined on equipment capable of maintaining watch-quality tolerances. And just to make sure, we spin every head.

BEYOND RAZOR SHARP

The single, most important attribute of a broadhead blade is sharpness (and its ability to stay sharp). Our blades are made from the finest stainless steel, tested for sharpness on laboratory equipment and given a final leather stopping to make sure you'll be shooting the sharpest blades in the bowhunting business. The first thing that touches an animal shot with a Solid broadhead is a razor sharp edge, and it leaves the animal in the same condition.

DEEP SIX

Let's face it, a bow and arrow is not a .458 Win. Mag. It's actually much, much more – but only if you have a Legend DG broadhead on the end of your arrow! The Legend DG is made to take on dangerous game and come out on top.

- SAMURAI-STYLE CURVED BLADES

DURABLE DESIGNS, SUPERIOR MATERIALS

Our unique Lockdown design, coupled with premium materials, ensures extreme, unmatched broadhead durability. While some companies use aluminum ferrules that fold on impact, we use the finest stainless steel, perfect to take an edge and keep it. Our high-quality, impact tested steel let's us offer a 100% guarantee on our broadheads.

TURKEY D-CAP

BLADE RETENTION AND
OVERALL STRENGTH
IMPROVED BY 30%
FOR 2016

**4" CUTTING
DIAMETER**

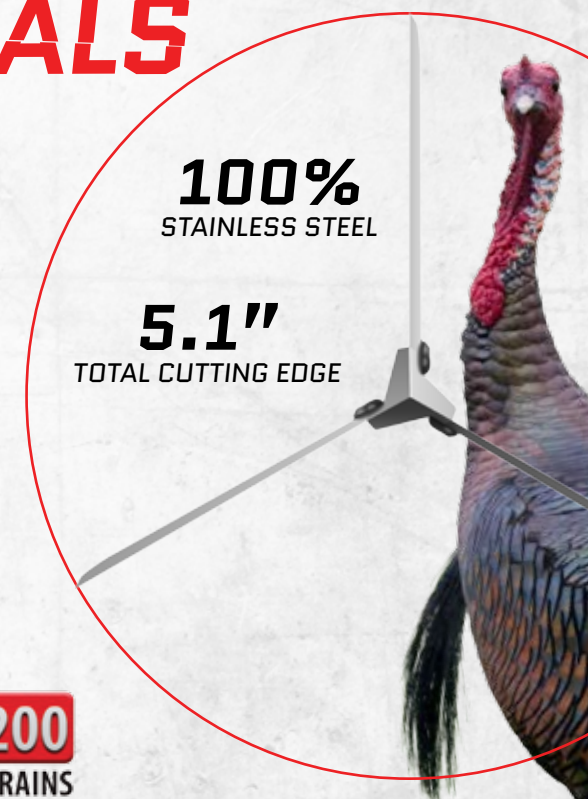

**200
GRAINS**

Ethical bowhunters know the right way to hunt turkeys is to shoot a Solid D-CAP and aim for the head and neck. No more fly-aways and no more wounded birds. Solid D-CAPs fly like darts (if you don't believe us, shoot one at 30 yards). They're razor sharp, crazy-durable and the .060" thick stainless steel blades mean if you touch a turkey's head – it's off.

- SINGLE-BEVEL SHARPENED EDGE FOR INCREASED STRENGTH THROUGH BONE
- .060" THICK STAINLESS STEEL BLADES
- ZERO-TAPERED FERRULE
- DESIGNED TO WITHSTAND MULTIPLE TURKEY HEADSHOTS
