Using only the industry's finest high-quality string materials.

Your bowstring is something you typically don't notice, until it no longer performs properly. Then it becomes the focal point of your bow. At Winner's Choice, we understand the hassles associated with string creep, peep rotation, serving separation and other accuracy-robbing string idiosyncrasies. That's why we set out to develop technologies and manufacturing methods, and find materials, that ensure your bowstring will perform flawlessly right out of the box and over time.

We take great pride in knowing that many of the very best hunters and shooters trust the performance of a Winner's Choice bowstring when they go afield or step up to the line. We think this is proof positive that our bowstrings perform like no other. Proof that our bowstrings offer superior stability, consistent accuracy, faster arrows.

Guaranteed 3-Day Shipping

We understand that when you need a new bowstring, you need it fast! That's why we build the world's most advanced and reliable bowstrings in short order and promise them to ship within from our factory three business days (excluding transit time).

Standard - BCY-X Material

Custom - BCY-X or 8190 Material

Super Custom - BCY-X, 8190, 8125G or 452X

As the industry leader in the production of premium-quality bow strings and cables we have made significant advancements in our string building process to maintain our reputation of offering the most stable strings and cables on the market. By listening to our customers and using the feedback from top professional and amateur archers worldwide we identified ways to eliminate accuracy robbing portions of the string building process. Through a proprietary combination of automated and hand building processes we have developed a string building system second to none!

Each fiber is prestretched, precision-measured, and perfectly paired with a family of complimentary strands to eradicate creep and peep rotation. Meanwhile the loop end serving process has been improved, delivering a cleaner look and feel as well as enhanced string performance to eliminate serving separation and premature wear. Winner's Choice bowstrings have the look and feel of true performance all with a Lifetime String Performance Guarantee unrivaled by any other string maker!

Build your own bowstring

Not only is a Winner's Choice bowstring the best you can buy, but now you can design your own! Go to the Winner's Choice website (scan the QR code for instant access) and you'll find our Custom Bowstring Builder, where you can choose your preferred bowstring material and select your favorite bowstring colors. The Custom Bowstring Builder lets you look at all of the color options.
